

Quiz (1)

Prepared by: Dr. Hessa Al-Junaid

24th February 2014

Time duration: 7 minutes

Q1] Subtract:

5 marks

$$\begin{array}{r} 11110100 \\ - 1000111 \\ \hline \end{array}$$

- the student will get 5/5 if he/she understands the operation with borrow & implement it.
- If the student understood the subtraction but mistaken she/he will get -1 for each mistake.
- if the student is not doing the subtraction but get the answer by converting to decimal 2.5.

Q2] Convert $(56)_{10}$ to binary. How many digits you require to represent the number?

5 marks

$$\begin{array}{cccccc} 32 & 16 & 8 & 4 & 2 & 1 \\ 1 & 1 & 1 & 0 & 0 & 0 \end{array}$$

it requires 6-bits.

- Using the weight method or division correctly 4/4
- any small mistake in 1 bit -1
- to get the number of bits correct 1 mark. 4/1
